

Airbus H120

The Airbus H120 is a light single-engine helicopter which can carry up to 4 passengers in addition to the pilot. The design of the cabin/luggage hold assembly, makes it particularly suitable for widely different types of civilian and para-public missions.

The first helicopter in its class (1.6 ton) to comply with the requirements of the new JAR 27 regulations, the "Colibri" is fitted with crash-resistant fuel system, pilot and passenger seats. Very silent (6.6 dB below the ICAO limit) and with a very wide cabin featuring excellent visibility, the Colibri's flight comfort is unique in its category. This extremely modern helicopter uses a lot of composite materials and is fitted with the latest technologies: a Turbomeca Arrius 2F engine and a new-generation shrouded tail rotor as well as modern avionics.

Capacity	1 Pilot & 4 passengers
Luggage Comp	4 standard size suitcases
Power Plant	1 x Turbomeca Arrius 2F
Fuel Capacity	321kg - 707lb
Max Cruise Speed	216km/h - 117kt/h
Max Range	710km - 383nm
