

## Cessna 650 Citation III

The Cessna 650 Citation III is one of the most reliable, mid-size long range corporate jets. With a remarkably high operational performance of about 51,000 feet flight level, 0.90 Mach speed and 1,700 nautical mile range, it responds to the requirements of even the most demanding passenger. The interior of the Citation III was designed to look and feel like the interior of a much larger, more expensive private jet, delivering comfortable travel accommodations, in perfect harmony with luxury and style. The notable combination of a high-performance, mid-sized aircraft with a spacious cabin, results to a flight experience that is simply put, outstanding.
